PROFESSIONAL SUMMARY

Frontend Developer with 6+ years of professional experience building production web applications, dashboards, booking platforms, real-time interfaces, and e-commerce websites. Strong in TypeScript, React/Next.js, Vue/Nuxt, REST APIs, WebSockets, and PWA development, with experience owning frontend architecture and delivering responsive, maintainable products in collaboration with cross-functional teams.

WORK EXPERIENCE

Planeya — Lead Frontend Developer | Jan 2026 – Present

- Built the entire frontend of a production online booking platform from scratch and took ownership of its architecture, technical decisions, and delivery.
- Developed the complete specialist workspace, including dashboard, services, schedules, appointments, calendar, profile, and account settings.
- Built the public booking flow with service and slot selection, client details, draft recovery, and conflict handling.
- Implemented the REST API integration layer, authentication, refresh-session recovery, protected requests, error handling, and cross-tab session synchronization.
- Delivered the PWA experience with service worker, offline fallback, installation, push notifications, and application update handling.
- Implemented seven-language localization, multilingual SEO, Playwright E2E tests, and CI checks while coordinating frontend work with backend, QA, design, and product management.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Zustand, React Hook Form, Zod, FullCalendar, i18next, PWA, Push API, Playwright, Docker, GitHub Actions, REST API

Intel Liftoff Project — Freelance Frontend Developer | Jun 2024 – Jan 2025

- Developed the frontend of a real-time messenger platform using Nuxt 3, Vue 3, TypeScript, and Pinia.
- Built channels, direct and group conversations, message interactions, file sharing, reactions, and responsive messaging interfaces.
- Integrated the frontend with REST APIs and implemented real-time communication through Socket.IO and WebSockets.
- Collaborated with the backend developer to connect frontend functionality with server-side APIs and real-time events.
- Authored comprehensive technical documentation covering functional requirements, frontend architecture, API contracts, WebSocket flows, integration scenarios, and system diagrams.
- Improved frontend stability, usability, responsive behavior, and cross-browser compatibility.

Technologies: Nuxt 3, Vue 3, TypeScript, Pinia, Socket.IO, WebSockets, REST API, Tailwind CSS, SCSS, Git

Knomary — Frontend Developer | Dec 2021 – May 2024

- Developed and maintained frontend functionality for corporate LMS platforms supporting employee training, testing, certification, and access to learning materials.
- Implemented new pages, UI components, and product features based on Figma designs using Vue 2 and Vue 3.
- Built responsive and cross-browser interfaces, improved UX/UI, and fixed frontend bugs across existing platform sections.
- Integrated frontend interfaces with REST APIs, including form validation, data handling, and API error handling.
- Developed administrative interfaces for selected client projects, including data tables, forms, filters, and data management workflows.
- Collaborated with backend developers, designers, and product managers to deliver product updates.

Technologies: JavaScript, Vue 2, Vue 3, jQuery, Twig, HTML, CSS, REST API, Git, Figma

iMedia Solutions — Frontend Developer | Mar 2021 – Dec 2021

- Built frontend implementations from scratch for corporate websites, landing pages, and e-commerce projects based on Figma designs.
- Developed responsive and cross-browser interfaces using semantic HTML, SCSS, JavaScript, jQuery, and BEM.
- Implemented complex animations and interactive transitions with GSAP and ScrollTrigger, including the Taurus Investment Group website.
- Improved website performance using Google Lighthouse and Web Vitals, achieving scores of 90–100 on most projects.

Technologies: JavaScript, jQuery, GSAP, ScrollTrigger, HTML, SCSS, CSS, BEM, Gulp, Git, Figma, Google Lighthouse, Web Vitals

Whale Studio — Frontend Developer | Sep 2019 – Feb 2021

- Built frontend implementations from scratch for landing pages, corporate websites, and e-commerce projects.
- Developed custom WordPress themes in PHP using ACF, custom post types, taxonomies, hooks, filters, and reusable templates.
- Customized WooCommerce storefronts, including product catalogs, product pages, cart, and checkout templates.
- Optimized and deployed websites to production, including performance improvements, hosting, domains, SSL, databases, backups, and migrations.

Technologies: JavaScript, jQuery, PHP, WordPress, WooCommerce, ACF, HTML, SCSS, CSS, BEM, Gulp, Git, MySQL, Google Lighthouse, PageSpeed Insights

SELECTED PROJECTS

Haviko — Full-Stack AI Web Application | Jul 2026 – Present

[Live Demo](#)

- Independently designed and built a production-ready application from initial concept to deployment, covering product planning, UX/UI, architecture, frontend, backend, database design, and external integrations.
- Developed a responsive purchasing workspace with CRUD operations, categories, priorities, statuses, images, search, filters, sorting, pagination, budget calculation, and progress tracking.
- Designed the data model with Prisma and Neon PostgreSQL and implemented authentication, user settings, data ownership checks, export, account deletion, and file cleanup through Clerk and Vercel Blob.
- Built store-offer management and secure product import from external URLs, including link normalization, redirect validation, private-network protection, and explicit user confirmation before saving data.
- Integrated Gemini and Tavily to provide structured purchasing recommendations and source-backed offer search with validation, usage limits, retry handling, and no automatic modification of user data.
- Delivered a five-language PWA with responsive mobile navigation, installation support, service worker, offline fallback, and production deployment on Vercel.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Prisma, Neon PostgreSQL, Clerk, Vercel Blob, Google Gemini, Tavily, React Hook Form, Zod, TanStack Table, next-intl, PWA, Vercel

SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Vue 2/3, Nuxt 3, HTML, CSS, SCSS, Tailwind CSS, jQuery
State, Forms & UI: Pinia, Zustand, React Hook Form, Zod, shadcn/ui, TanStack Table

APIs, Backend & Data: REST API, WebSockets, Socket.IO, Node.js, Prisma, PostgreSQL (Neon), Clerk

Testing & Tooling: Playwright, Git, GitHub Actions, Docker, Vite, Vercel, Figma

Web & CMS: PWA, Responsive Design, Performance Optimization, WordPress, WooCommerce, PHP, MySQL, ACF

AI Tools & Integrations: Google Gemini, Tavily, OpenAI Codex
